

# Back-End Developer Roadmap

Starting with web development can be overwhelming. This back-end developer roadmap will guide you to start with it in the proper way. We will cover the most important building blocks of the web. This guide will help you to become a modern back-end developer.

# Learn Basic Front-End Dev

You must know basics of front-end development, and how things work in the browser.

HTML

CSS

JavaScript

Once you know basic front-end, you can then jump right into learning a programming language, there are so many options of programming language that you can learn to become a backend developer.

**Note:** You don't need to know multiple programming languages to become a backend developer.

# Choose a Programming language

JavaScript

Python

PHP

Ruby

Rust

Java

Go Lang

# Then choose a Framework according to your programming language

 JavaScript

JavaScript Runtime

 Node.js

 Deno

# Node.js Popular Framework

---

ex

Express.js

Nest.js

Fastify

Sails

Hapi

Restify

koa

Koa

# Python

## Popular Framework

---

Django

Flask

# PHP

## Popular Framework

---

Laravel

Symfony

**Ruby**

**Popular Framework**

---

**Rails**

**Sinatra**

**Java**

**Popular Framework**

---

**Spring**

**Google Web Toolkit**

# Rust

## Popular Framework

---

Rocket

# Rocket.rs

GO

# GO

## Popular Framework

---

# Gin

# ASP .NET

asp.net is also a popular framework of C#

# Backend concepts you should learn

HTTP / HTTPS

REST

GraphQL

Web Sockets

CORS

MVC Architecture

CI / CD

Serverless

# Learn about databases

## 2 Types of Databases

SQL

NoSQL

MySQL

MongoDB

PostgreSQL

CouchDB

SQL Lite

DynamoDB

# Learn Caching

Redis

Memcached

## ORM / ODM

Mongoose (MongoDB)

Prisma (SQL)

Sequelize (SQL)

# Essential things to learn

Authentication

OAuth

Hashing (bcrypt)

Rate Limiting

Reverse proxy

Load balancer

Documentation (Swagger)

# Learn any HTML Templating Engine

EJS

PUG

Handlebars

doT

Jade

Eta

# Other Important Topics

Linux

Terminal (CLI)

Git

Basic Networking

Web Security

Payment Gateways

Testing

# Learn to deploy and learn any cloud service

Google Cloud

Digital Ocean

AWS

Azure

Heroku

Linode

Vercel

# Optional things to learn

Docker

Performance

Scalability

Kubernetes

# Tools to learn as a backend developer

NPM

Yarn

Postman

Insomnia

GitHub

# Project Ideas

Social Media Web App

Chat App

Video Chat App

REST API

Amazon Scraper API

Web Scraper

URL Shortner

CRUD Blog App

# Project Ideas

Discord Clone [with webRTC](#)

Travel Log App

File Sharing App

Users System

Multiplayer Game

Gist Clone

Weather Logger

Ecommerce API

# Important Note

You don't need to learn all the things mention in this roadmap to become a back-end developer or get a job as a back-end developer.

There is no end of learning in web development there's always something to learn.

**So never stop learning!**
